SOSTENI BILITÀ

Ogni rifiuto al suo posto. Il maggiore spreco dei rifiuti riguarda gli errori che possiamo fare con la raccolta differenziata. Significa aumentare l'inquinamento e la sporcizia (compresi gli oggetti che finiscono nelle discariche) e azzerare le possibilità del riciclo. In genere, trovate le regole su come separare i materiali direttamente sui cassonetti adibiti alla raccolta ma non sempre è facile capire se quel determinato rifiuto deve essere riciclato oppure buttato via perché non recuperabile. Per dare il nostro contributo abbiamo applicato alle scatole dei nostri prodotti un QR code che rimanda alle indicazioni necessarie per smaltire correttamente i vari materiali.

SUSTAI NAB

Putting every waste in its place. The biggest rubbish waste concerns the mistakes we risk to make when recycling. This means increasing pollution and litter (including items that end up in landfills) and zeroing the chances of recycling. You can usually find the rules on how to separate materials directly on the collection bins. However it is not always easy to understand whether that particular waste should be recycled or thrown away because it cannot be recovered. To make our own contribution, on all our product boxes we put a QR code that links to the necessary instructions on how to dispose of the various materials correctly.

#savewater

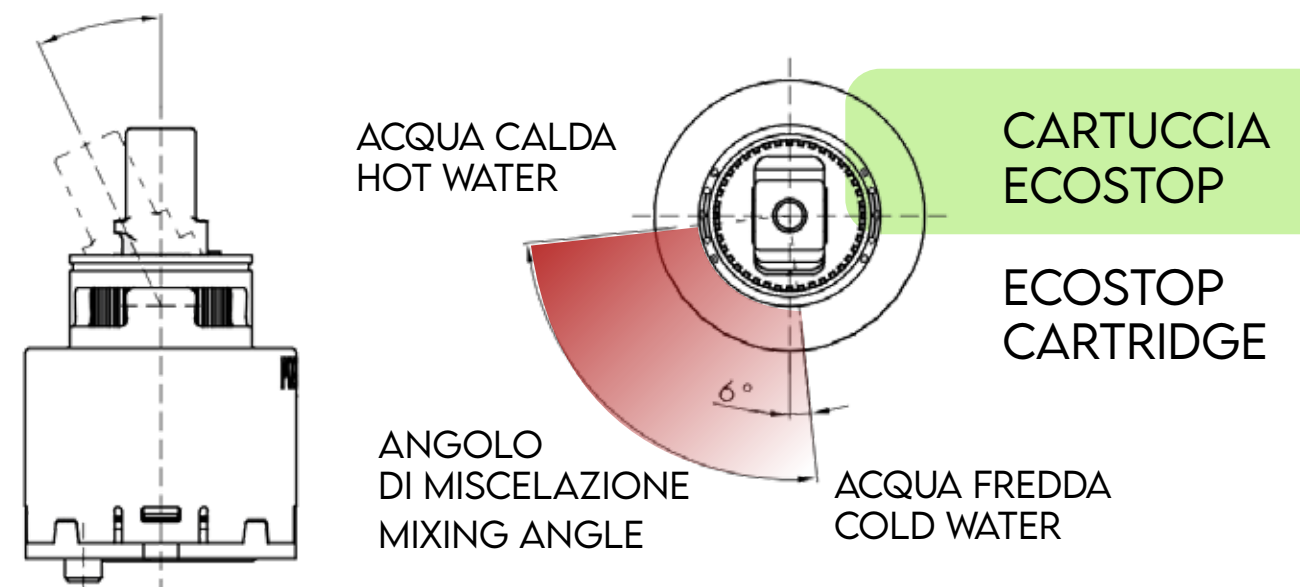

L'acqua potabile è la base fondamentale per la vita sul nostro pianeta ed è nostro dovere proteggere e preservare questa preziosa risorsa. Consigliamo l'utilizzo di speciali accessori per ridurre la portata in modo che venga usata la giusta quantità di acqua, nè troppo poca nè troppa. Ridurre il consumo di acqua significa ridurre anche l'energia necessaria per scaldarla e produrla, ottenendo quindi anche una riduzione delle emissioni di CO2.

Drinking water is essential for life on our planet, and it is our responsibility to protect and preserve this precious resource. We recommend using special accessories to regulate water flow, ensuring that only the necessary amount of water is used—neither too little nor too much. Reducing water consumption also means lowering the energy required to heat and produce it, which in turn helps cut CO2 emissions.

MODI SEMPLICI PER RISPARMIARE ACQUA EASY WAYS TO SAVE WATER

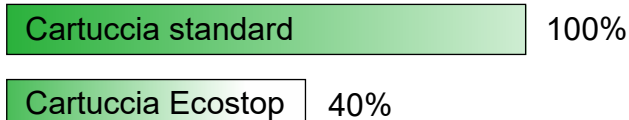

La cartuccia EcoStop consente di risparmiare acqua ed energia grazie al suo speciale funzionamento. Per estetica e praticità si è soliti azionare la leva dalla posizione centrale, in questo modo però si fa accendere la caldaia inutilmente. Con la nostra cartuccia eco la leva si sposta da sinistra fino al centro, posizione in cui si avrà acqua non più miscelata ma fredda. La cartuccia ha anche una resistenza in apertura che dissuade dall'aprire l'acqua con la massima portata se non è necessario. Due piccoli accorgimenti che aiutano a salvaguardare l'ambiente e... anche il portafoglio!

The Eco Stop cartridge saves both water and energy thanks to its innovative design. For aesthetic and practical reasons, people tend to operate the lever from the central position, which often triggers the boiler unnecessarily. With our eco-friendly cartridge, the lever moves from left to centre, a position where water is cold instead of being mixed. Additionally, the cartridge features an opening resistance that discourages using full water flow when it is not needed. Two simple solutions that help protect the environment... and your wallet!

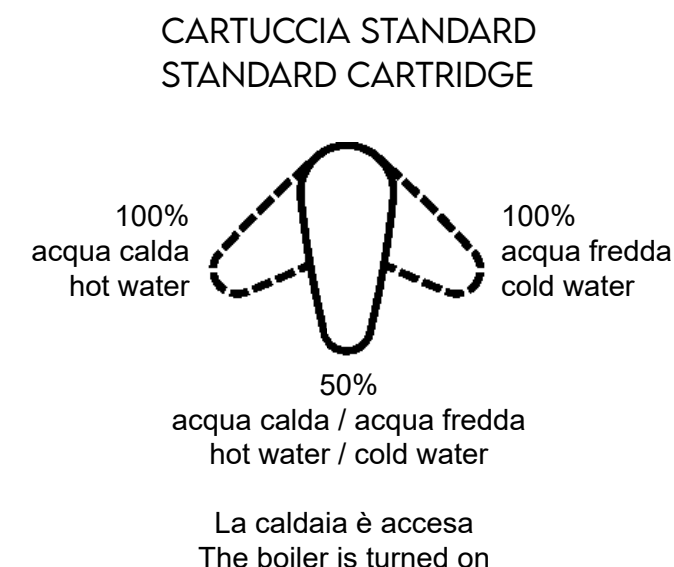

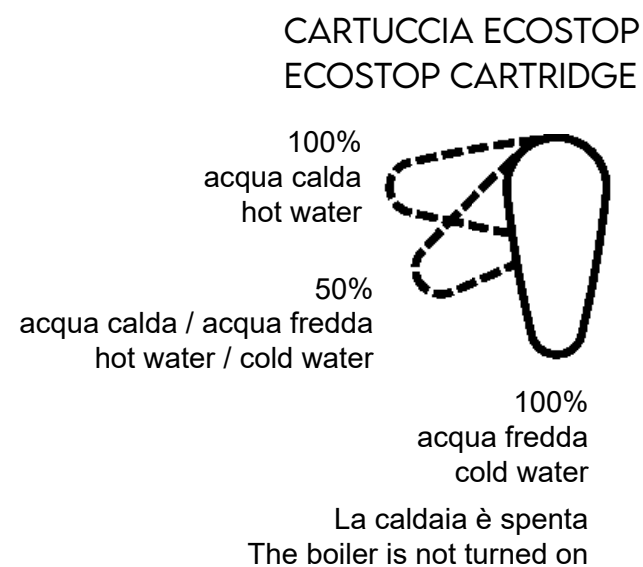

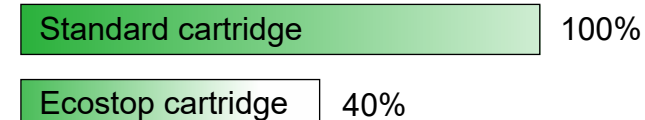

I miscelatori dotati di cartuccia Eco Stop consentono di risparmiare su:

- Acqua: l'utilizzo dell'acqua è ridotto del 60% circa. Con un semplice gesto si apre la leva e si ottiene un flusso d'acqua sufficiente per l'uso quotidiano. Se si desidera la portata massima, basta alzare la leva fino alla posizione massima.
- Energia: la maniglia in posizione centrale genera solo acqua fredda. In questo modo, si riduce l'energia necessaria per produrre acqua calda. Solo quando l'acqua calda è veramente desiderata, si gira la leva.

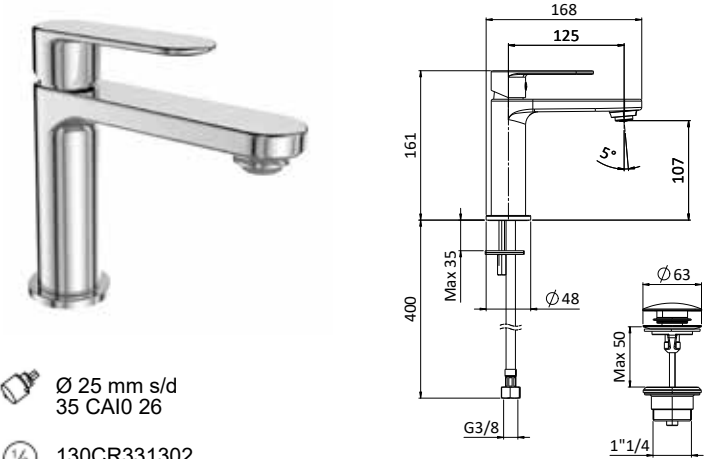

Mixers equipped with Eco Stop cartridge can save on:

- Water: water consumption is reduced by approximately 60%. With a smooth gesture, you can lift the lever to achieve an adequate flow for daily use. If maximum flow is needed, simply raise the lever to its highest position.
- Energy: when in its central position, the lever only dispenses cold water, preventing unnecessary mixing of hot and cold from the start. This reduces the energy required to produce hot water. Only when turning the lever you get hot water.

Xenon Steel, una serie completa prodotta totalmente in acciaio inox 316L. L'acciaio inox è un materiale sano, duraturo, atossico: non contiene tracce di piombo e non rilascia nichel. A livello produttivo viene trattato solo meccanicamente, non subisce alcun processo chimico che può essere causa di inquinamento. Garantisce una durata eccezionale, data la sua solidità, ed è uno dei materiali migliori per il contatto con l'acqua potabile.

Xenon Steel, a complete series made entirely of 316L stainless steel. Stainless steel is a healthy, durable, non-toxic material: it contains no traces of lead and does not release nickel. At the production level it is only treated mechanically, it does not undergo any chemical process that can cause pollution. It guarantees exceptional durability, given its solidity, and is one of the best materials for contact with drinking water.

La bellezza del segno umano

Ci sono superfici che parlano.

Quelle spazzolate a mano raccontano una storia fatta di gesti lenti, intenzionali, mai uguali. Ogni rubinetto nasce da una lavorazione artigianale, dove la precisione della mano incontra la materia, trasformandola. Il metallo prende vita attraverso sfumature, graffiature e riflessi unici – piccoli segni che rendono ogni pezzo diverso, autentico, irripetibile. Non è solo una finitura: è un'impronta. Un dettaglio che esprime carattere, calore, personalità. Per chi cerca non solo un oggetto, ma una presenza che racconti l'essenza del fatto a mano.

The beauty of the human touch

There are surfaces that speak.

Those brushed by hand tell a story of slow, deliberate, never identical gestures. Each faucet is born out of artisanal craftsmanship, where the precision of the hand meets the raw material and transforms it. The metal comes to life through shades, textures and light reflections — subtle traits that make every piece different, authentic and one-of-a-kind. It is not just a finish: it is an imprint. A detail that conveys character, warmth, and personality. For those who seek more than just an object, but rather a presence that embodies the essence of the handmade.

La bellezza del segno umano

Ci sono superfici che parlano.

Quelle spazzolate a mano raccontano una storia fatta di gesti lenti, intenzionali, mai uguali. Ogni rubinetto nasce da una lavorazione artigianale, dove la precisione della mano incontra la materia, trasformandola. Il metallo prende vita attraverso sfumature, graffiature e riflessi unici – piccoli segni che rendono ogni pezzo diverso, autentico, irripetibile. Non è solo una finitura: è un'impronta. Un dettaglio che esprime carattere, calore, personalità. Per chi cerca non solo un oggetto, ma una presenza che racconti l'essenza del fatto a mano.

The beauty of the human touch

There are surfaces that speak.

Those brushed by hand tell a story of slow, deliberate, never identical gestures. Each faucet is born out of artisanal craftsmanship, where the precision of the hand meets the raw material and transforms it. The metal comes to life through shades, textures and light reflections — subtle traits that make every piece different, authentic and one-of-a-kind. It is not just a finish: it is an imprint. A detail that conveys character, warmth, and personality. For those who seek more than just an object, but rather a presence that embodies the essence of the handmade.

Urban Bronze

L'eleganza calda della materia

Urban Bronze è più di un colore: è un'atmosfera. Ispirato ai toni profondi del metallo brunito, questo marrone ricco e sofisticato richiama la forza della terra e la raffinatezza dell'architettura urbana. Una tonalità calda e avvolgente, capace di dare carattere agli spazi senza mai risultare invadente. Perfetto per ambienti contemporanei, Urban Bronze si abbina con materiali come pietra, legno scuro, cemento e superfici opache. Un colore pensato per chi cerca un design senza tempo, dove sobrietà e personalità convivono in equilibrio. Con Urban Bronze, ogni dettaglio si trasforma in un segno distintivo.

Royal Graphite

Royal Graphite è una dichiarazione di stile.

Una tonalità intensa, profonda, che unisce la forza del grigio antracite alla raffinatezza di un finish opaco, per un effetto visivo ricco e sofisticato. Deciso ma equilibrato, questo colore veste la rubinetteria con una presenza scenica sobria e moderna. Perfetto in ambienti dal design minimale, industriale o contemporaneo, Royal Graphite si abbina con materiali naturali come pietra, legno chiaro, cemento e metalli satinati. Ogni superficie trattata in Royal Graphite acquisisce profondità e personalità, diventando protagonista senza mai sovrastare l'ambiente. Con Royal Graphite, il dettaglio si fa stile.

Royal Graphite is a statement of style

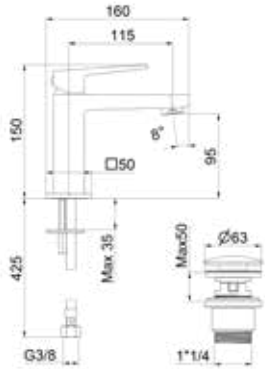

An intense, deep shade that blends the strength of anthracite grey with the elegance of a matte finish, creating a rich and sophisticated visual effect. Bold yet balanced, this color enriches the faucet with a discreet, modern look. Perfect in minimalist, industrial, or contemporary interiors, Royal Graphite harmonizes with natural materials such as stone, light wood, concrete, and satin metals. Every surface treated in Royal Graphite gains depth and personality, becoming a protagonist without ever overpowering the space. With Royal Graphite, detail becomes style.

#savewater

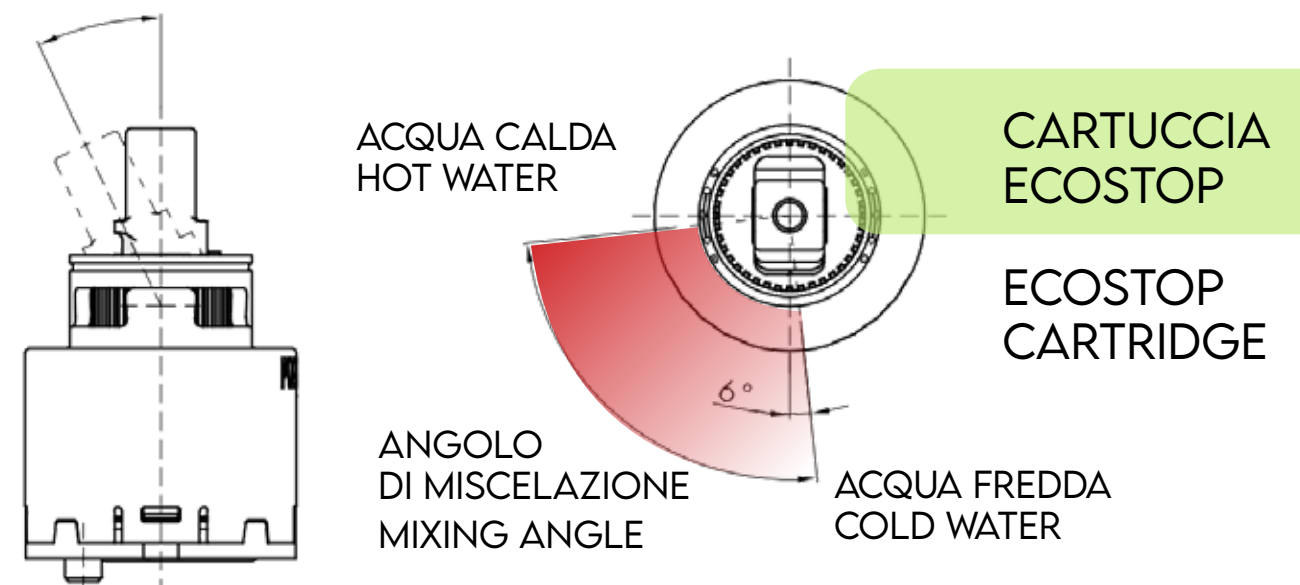

L'acqua potabile è la base fondamentale per la vita sul nostro pianeta ed è nostro dovere proteggere e preservare questa preziosa risorsa. Consigliamo l'utilizzo di speciali accessori per ridurre la portata in modo che venga usata la giusta quantità di acqua, nè troppo poca nè troppa. Ridurre il consumo di acqua significa ridurre anche l'energia necessaria per scaldarla e produrla, ottenendo quindi anche una riduzione delle emissioni di CO2.

Drinking water is essential for life on our planet, and it is our responsibility to protect and preserve this precious resource. We recommend using special accessories to regulate water flow, ensuring that only the necessary amount of water is used—neither too little nor too much. Reducing water consumption also means lowering the energy required to heat and produce it, which in turn helps cut CO2 emissions.

MODI SEMPLICI PER RISPARMIARE ACQUA EASY WAYS TO SAVE WATER

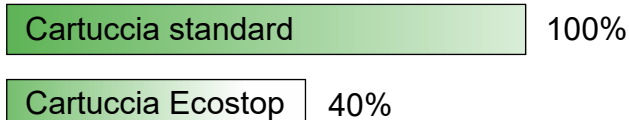

La cartuccia EcoStop consente di risparmiare acqua ed energia grazie al suo speciale funzionamento. Per estetica e praticità si è soliti azionare la leva dalla posizione centrale, in questo modo però si fa accendere la caldaia inutilmente. Con la nostra cartuccia eco la leva si sposta da sinistra fino al centro, posizione in cui si avrà acqua non più miscelata ma fredda. La cartuccia ha anche una resistenza in apertura che dissuade dall'aprire l'acqua con la massima portata se non è necessario. Due piccoli accorgimenti che aiutano a salvaguardare l'ambiente e... anche il portafoglio!

The Eco Stop cartridge saves both water and energy thanks to its innovative design. For aesthetic and practical reasons, people tend to operate the lever from the central position, which often triggers the boiler unnecessarily. With our eco-friendly cartridge, the lever moves from left to centre, a position where water is cold instead of being mixed. Additionally, the cartridge features an opening resistance that discourages using full water flow when it is not needed. Two simple solutions that help protect the environment... and your wallet!

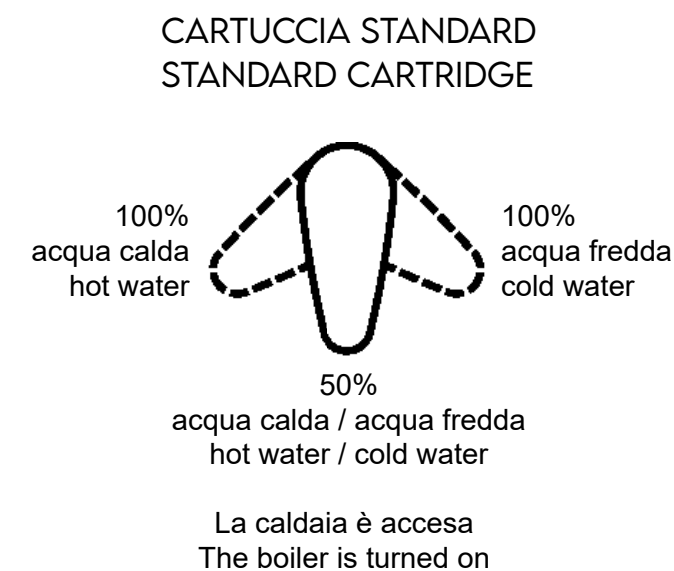

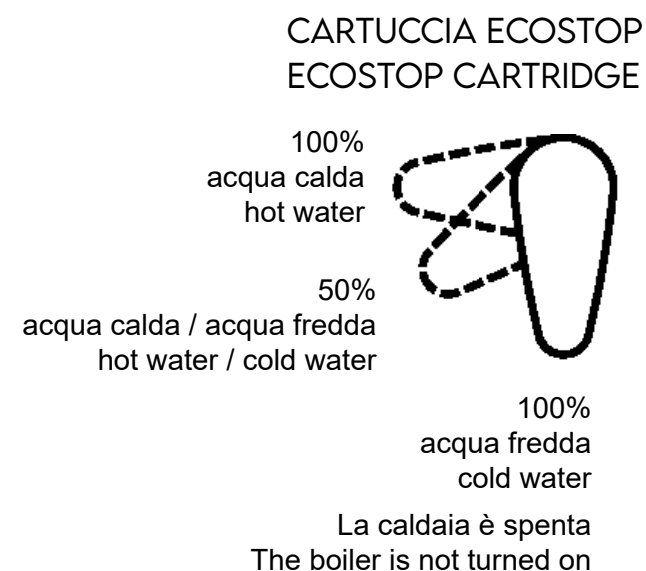

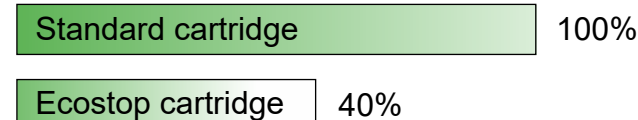

I miscelatori dotati di cartuccia Eco Stop consentono di risparmiare su:

- Acqua: l'utilizzo dell'acqua è ridotto del 60% circa. Con un semplice gesto si apre la leva e si ottiene un flusso d'acqua sufficiente per l'uso quotidiano. Se si desidera la portata massima, basta alzare la leva fino alla posizione massima.
- Energia: la maniglia in posizione centrale genera solo acqua fredda. In questo modo, si riduce l'energia necessaria per produrre acqua calda. Solo quando l'acqua calda è veramente desiderata, si gira la leva.

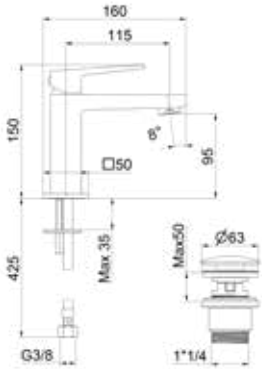

Mixers equipped with Eco Stop cartridge can save on:

- Water: water consumption is reduced by approximately 60%. With a smooth gesture, you can lift the lever to achieve an adequate flow for daily use. If maximum flow is needed, simply raise the lever to its highest position.
- Energy: when in its central position, the lever only dispenses cold water, preventing unnecessary mixing of hot and cold from the start. This reduces the energy required to produce hot water. Only when turning the lever you get hot water.

Il modello XENON rappresenta l'essenza del design moderno. Realizzato in finitura cromata lucida, si distingue per la sua eleganza e raffinatezza, ideale per ambienti bagno contemporanei. La linea slanciata e cilindrica del corpo del rubinetto, unita alla leva sottile e lineare, offre un equilibrio perfetto tra estetica e funzionalità. La bocca di erogazione, leggermente incurvata, non solo facilita il flusso dell'acqua, ma aggiunge un tocco di morbidezza visiva al design. Scegliendo XENON, si opta per un rubinetto che non è solo un accessorio funzionale, ma un vero e proprio elemento d'arredo per il bagno. Un simbolo di stile e qualità, firmato Fiore Rubinetterie, sinonimo di eccellenza dal 1965.

Our XENON represents the essence of modern design.

Made in a shiny chrome finish, it stands out for its elegance and refinement, ideal for contemporary bathrooms.

The slender and cylindrical shape of the tap body, combined with the thin and linear lever, offers a perfect balance between aesthetics and functionality. The slightly curved spout not only facilitates the flow of water, but also adds a touch of visual softness to the design.

By choosing XENON, you opt for a tap that is not just a functional accessory, but a real furnishing element for your bathroom. A symbol of style and quality, signed by Fiore Rubinetterie, synonym for excellence since 1965.

#savewater

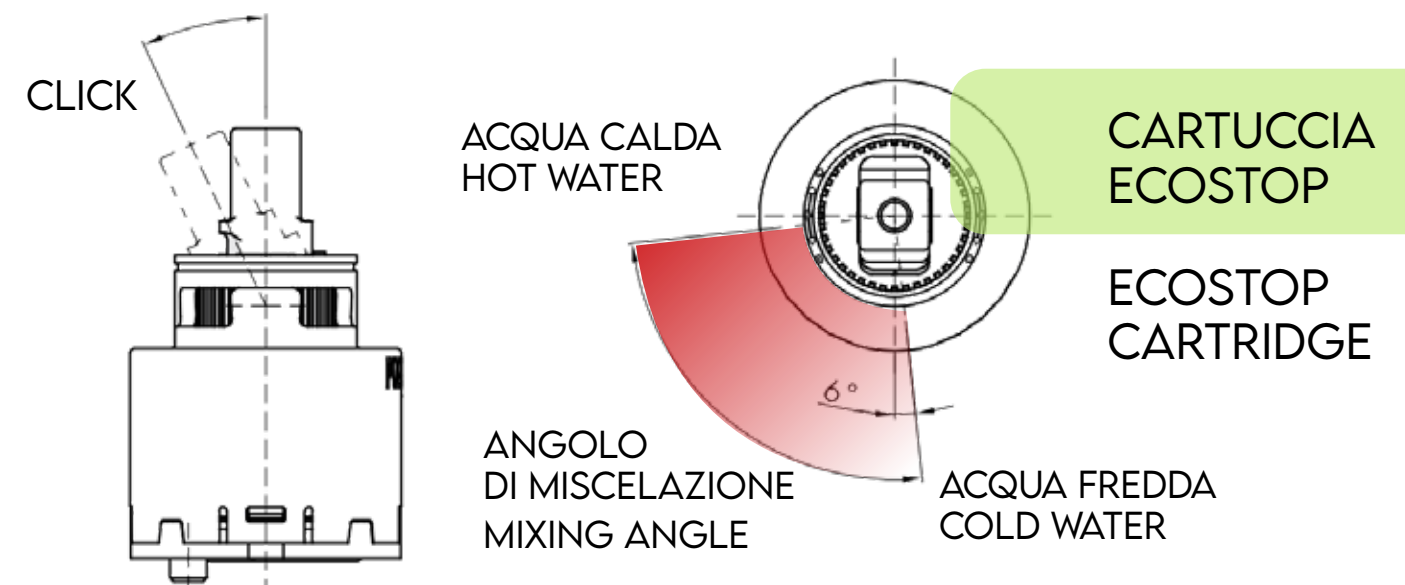

L'acqua potabile è la base fondamentale per la vita sul nostro pianeta ed è nostro dovere proteggere e preservare questa preziosa risorsa. Consigliamo l'utilizzo di speciali accessori per ridurre la portata in modo che venga usata la giusta quantità di acqua, nè troppo poca nè troppa. Ridurre il consumo di acqua significa ridurre anche l'energia necessaria per scaldarla e produrla, ottenendo quindi anche una riduzione delle emissioni di CO2.

Drinking water is essential for life on our planet, and it is our responsibility to protect and preserve this precious resource. We recommend using special accessories to regulate water flow, ensuring that only the necessary amount of water is used—neither too little nor too much. Reducing water consumption also means lowering the energy required to heat and produce it, which in turn helps cut CO2 emissions.

MODI SEMPLICI PER RISPARMIARE ACQUA EASY WAYS TO SAVE WATER

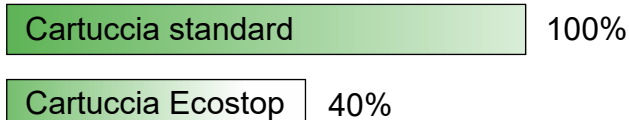

La cartuccia EcoStop consente di risparmiare acqua ed energia grazie al suo speciale funzionamento. Per estetica e praticità si è soliti azionare la leva dalla posizione centrale, in questo modo però si fa accendere la caldaia inutilmente. Con la nostra cartuccia eco la leva si sposta da sinistra fino al centro, posizione in cui si avrà acqua non più miscelata ma fredda. La cartuccia ha anche una resistenza in apertura che dissuade dall'aprire l'acqua con la massima portata se non è necessario. Due piccoli accorgimenti che aiutano a salvaguardare l'ambiente e... anche il portafoglio!

The Eco Stop cartridge saves both water and energy thanks to its innovative design. For aesthetic and practical reasons, people tend to operate the lever from the central position, which often triggers the boiler unnecessarily. With our eco-friendly cartridge, the lever moves from left to centre, a position where water is cold instead of being mixed. Additionally, the cartridge features an opening resistance that discourages using full water flow when it is not needed. Two simple solutions that help protect the environment... and your wallet!

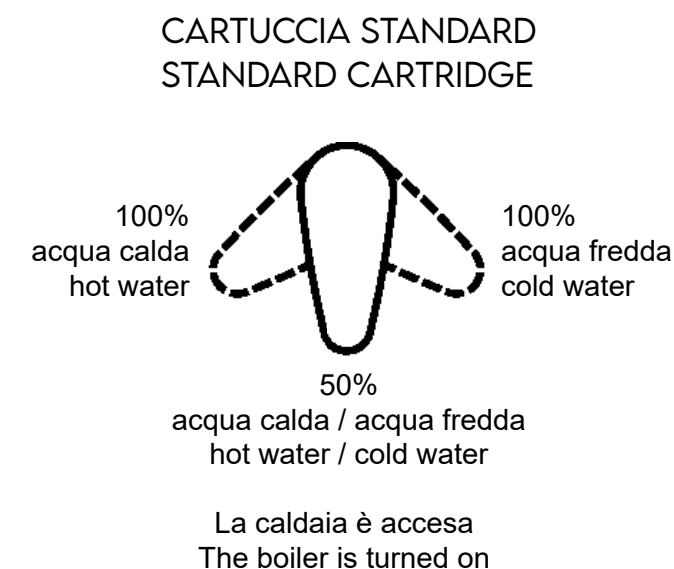

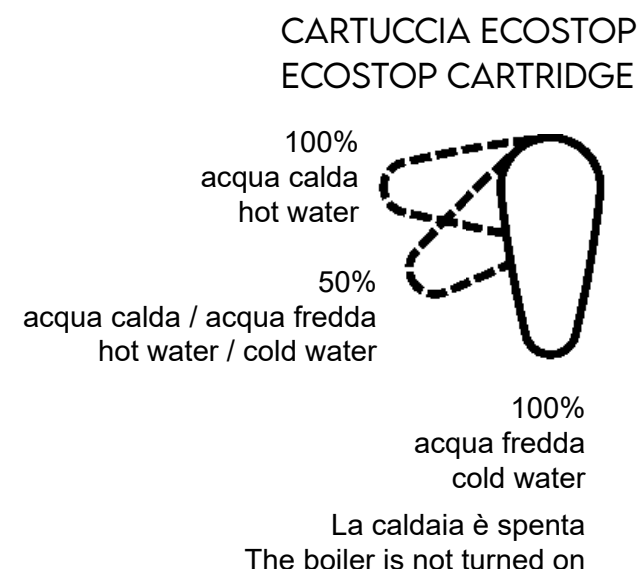

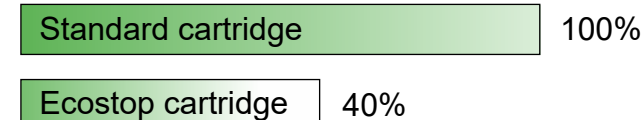

I miscelatori dotati di cartuccia Eco Stop consentono di risparmiare su:

- Acqua: l'utilizzo dell'acqua è ridotto del 60% circa. Con un semplice gesto si apre la leva e si ottiene un flusso d'acqua sufficiente per l'uso quotidiano. Se si desidera la portata massima, basta alzare la leva fino alla posizione massima.
- Energia: la maniglia in posizione centrale genera solo acqua fredda. In questo modo, si riduce l'energia necessaria per produrre acqua calda. Solo quando l'acqua calda è veramente desiderata, si gira la leva.

Mixers equipped with Eco Stop cartridge can save on:

- Water: water consumption is reduced by approximately 60%. With a smooth gesture, you can lift the lever to achieve an adequate flow for daily use. If maximum flow is needed, simply raise the lever to its highest position.
- Energy: when in its central position, the lever only dispenses cold water, preventing unnecessary mixing of hot and cold from the start. This reduces the energy required to produce hot water. Only when turning the lever you get hot water.

BENVENUTI NELL'ERA DELL'IDRAULICA SENZA LIMITI!

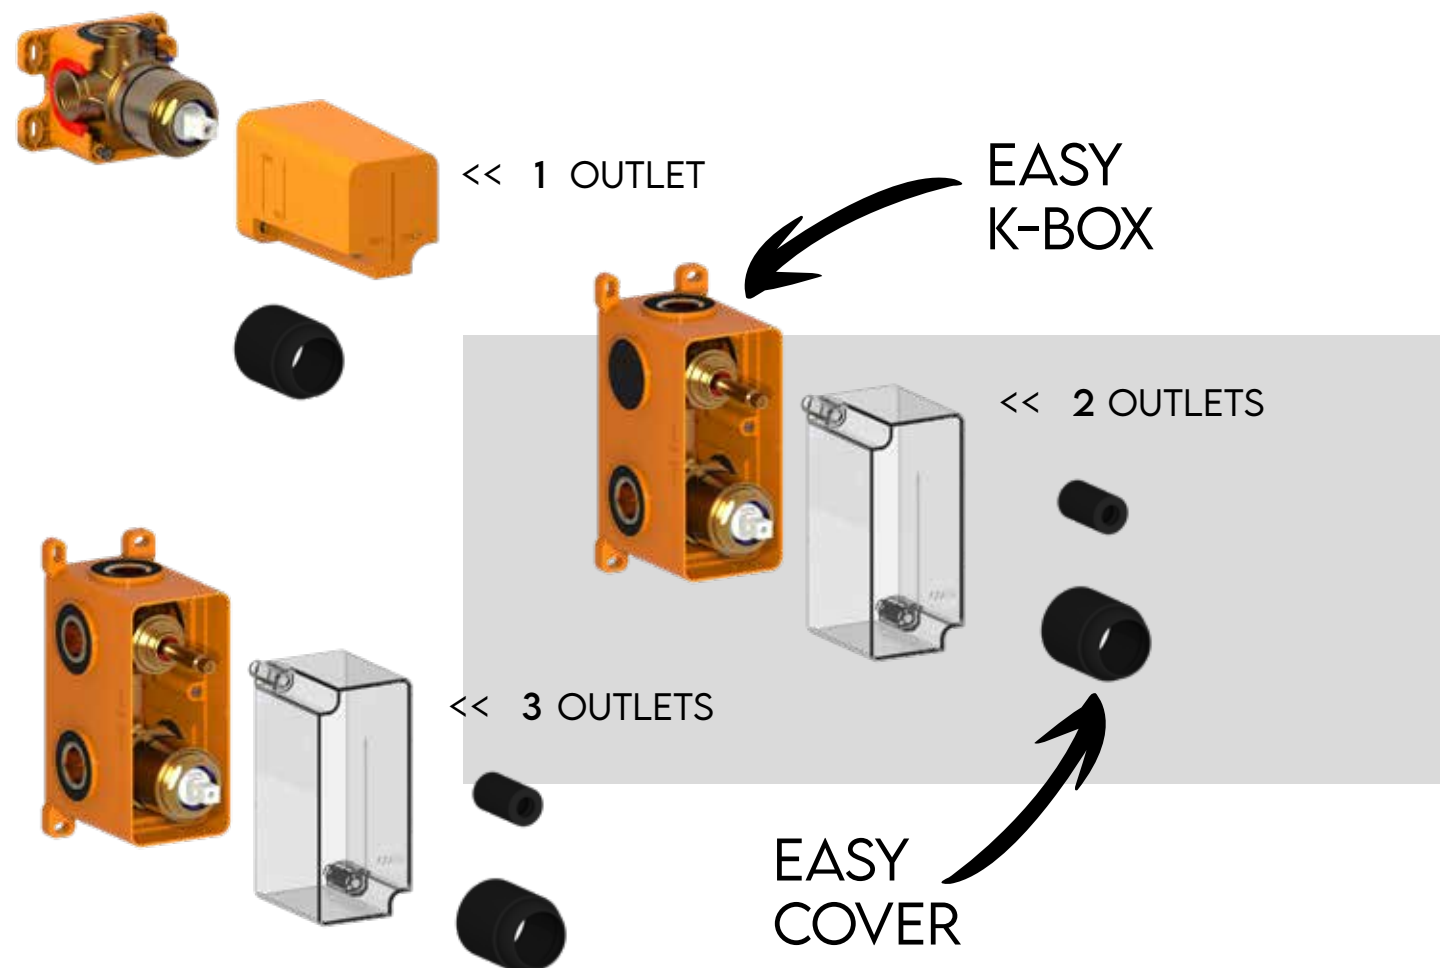

WELCOME TO THE AGE OF PLUMBING WITH NO LIMITS!

Il nostro nuovo progetto sui corpi incasso è un'ottima soluzione per chi desidera combinare funzionalità, estetica e flessibilità. Un nuovo modo di vedere e di vivere la progettazione dell'ambiente bagno per quanto riguarda miscelatori da incasso lavabo e doccia, che offre la libertà di decidere senza limiti.

La possibilità di installazione solo del corpo incasso facilita sia il lavoro dell'idraulico, il quale può procedere senza le parti esterne, sia il cliente che ha tutto il tempo di decidere comodamente design e finitura per rispettare lo stile del bagno.

Our new design on concealed bodies is an excellent solution for those who wish to combine functionality, aesthetics and flexibility. A new way of looking at and experiencing bathroom design with regard to concealed basin and shower mixers, which offers the freedom to decide without limits.

The possibility of installing only the built-in body facilitates both the work of the plumber, who can proceed without the external parts, as well as the customer who has plenty of time to comfortably decide on the design and finish to match the style of the bathroom.

Questi miscelatori sono progettati per controllare il flusso e la temperatura dell'acqua per una singola uscita, che di solito è il soffione della doccia. Sono costituiti principalmente da una valvola miscelatrice interna che regola il flusso dell'acqua calda e fredda e un'impugnatura esterna per controllare la temperatura e il flusso.

These mixers are designed to control the flow and temperature of water for a single outlet, which is usually the shower head. They mainly consist of an internal mixing valve that regulates the flow of hot and cold water and an external handle to control the temperature and flow.

EASY K-BOX _ EASY COVER

Questi miscelatori hanno due o tre uscite che possono essere utilizzate per controllare due flussi d'acqua separati, ad esempio un soffione a soffitto e una doccia a parete. Hanno una struttura simile ai miscelatori con una sola uscita, ma con una valvola aggiuntiva chiamata deviatore che devia il flusso fra la prima, la seconda uscita e la terza uscita, il deviatore può essere meccanico, per le due uscite quindi con pulsante da premere per deviare che torna poi alla posizione originaria, oppure con deviatore ceramico per le due uscite e le tre uscite moderno ed ergonomico. Anche in questo caso, l'utente può regolare la temperatura e il flusso dell'acqua attraverso un'unica impugnatura esterna.

These mixers have two or three outlets that can be used to control two separate water flows, for example a ceiling-mounted shower head and a wall-mounted shower. They have a similar structure to 1-outlet mixers, but with an additional valve called a diverter that diverts the flow between the first, second and third outlet. The diverter can be mechanical, for the two outlets then with a button to press to divert which then returns to the original position, or with ceramic diverter for the two outlets and the three outlets, modern and ergonomic. Also in this case, the user can adjust the temperature and water flow through a single external handle.

BUILT-IN BODY FOR WALL BASIN MIXER WITH
SINGLE HORIZONTAL PLATE AND SEPARATE PLATES

Il nostro nuovo progetto sui corpi incasso è un'ottima soluzione per chi desidera combinare funzionalità, estetica e flessibilità. Un nuovo modo di vedere e di vivere la progettazione dell'ambiente bagno per quanto riguarda miscelatori da incasso lavabo e doccia, che offre la libertà di decidere senza limiti. La possibilità di installazione solo del corpo incasso facilita sia il lavoro dell'idraulico, il quale può procedere senza le parti esterne, sia il cliente che ha tutto il tempo di decidere comodamente design e finitura per rispettare lo stile del bagno.

Our new design on concealed bodies is an excellent solution for those who wish to combine functionality, aesthetics and flexibility. A new way of looking at and experiencing bathroom design with regard to concealed basin and shower mixers, which offers the freedom to decide without limits. The possibility of installing only the built-in body facilitates both the work of the plumber, who can proceed without the external parts, as well as the customer who has plenty of time to comfortably decide on the design and finish to match the style of the bathroom.

THERMO EASY K-BOX

BENVENUTI NELL'ERA DELL'IDRAULICA SENZA LIMITI!

WELCOME TO THE AGE OF PLUMBING WITH NO LIMITS!

NUOVO DOCCIA INCASSO THERMOSTATICO

NEW THERMOSTATIC BUILT-IN BODY

Il nostro nuovo progetto sui corpi incasso è un'ottima soluzione per chi desidera combinare funzionalità, estetica e flessibilità. Un nuovo modo di vedere e di vivere la progettazione dell'ambiente bagno per quanto riguarda miscelatori da incasso lavabo e doccia, che offre la libertà di decidere senza limiti.

La possibilità di installazione solo del corpo incasso facilita sia il lavoro dell'idraulico, il quale può procedere senza le parti esterne, sia il cliente che ha tutto il tempo di decidere comodamente design e finitura per rispettare lo stile del bagno.

Our new design on concealed bodies is an excellent solution for those who wish to combine functionality, aesthetics and flexibility. A new way of looking at and experiencing bathroom design with regard to concealed basin and shower mixers, which offers the freedom to decide without limits.

The possibility of installing only the built-in body facilitates both the work of the plumber, who can proceed without the external parts, as well as the customer who has plenty of time to comfortably decide on the design and finish to match the style of the bathroom.

Il rivestimento protettivo facilita la pulizia del box doccia. Grazie alle proprietà idrorepellenti del rivestimento, le goccioline d'acqua non aderiscono alla superficie del vetro, ma scivolano via senza lasciare residui.
Glass protection coating allows to clean the shower enclosure easily. Due to hydrophobic properties of the coating, water drops does not stay on the glass but streams down without leaving the stains.

COME ORDINARE LE FINITURE SUPERFICIALI

Per i rubinetti monocomando, per i rubinetti a doppia maniglia e per gli accessori bagno la finitura è indicata dalle due lettere nel codice articolo: per esempio 47 CR 5221.
47 è il codice per la leva JAFAR
CR è il codice per la finitura Cromo
5221 è il codice di quel modello

Potete indicare una finitura differente usando un codice diverso al posto di CR, quindi:
CR = Cromo
ZZ = Vecchio Bronzo
RR = Vecchio Rame
OO = Oro
CO = Cromo/Oro

Per esempio:
47CR5221 è per il cromo
47ZZ5221 è per il vecchio bronzo
47RR5221 è per il vecchio rame
47OO5221 è per l'oro
47CO5221 è per il cromo/oro

CURA DELLE FINITURE: Si consiglia di mantenere la superficie del prodotto sempre pulita in modo che lo sporco e il calcare non attacchino la finitura.
Per pulire il prodotto acquistato utilizzare un panno morbido, acqua e sapone neutro in modo da non graffiare ed alterare la finitura. Il sapone deve essere risciacquato accuratamente con acqua in modo che non si depositi sul rubinetto.
L'uso di prodotti abrasivi (es. prodotti a base di ammoniaca) possono danneggiare la superficie. Per tali danni il prodotto non è in garanzia.
Le finiture speciali sono il risultato di particolari processi produttivi che ne aggiungono valore. Variazioni minori ed imperfezioni sono da considerarsi una virtù di esclusività del pezzo stesso.
Tutte le immagini delle finiture sono solo indicative, pertanto non sono vincolanti per la reale esecuzione. Inoltre Fiore Rubinetterie si riserva il diritto di modificare o cambiare lo stile di alcune finiture senza preavviso. La garanzie sulle niture esterne degli articoli è di 1 anno dalla data di acquisto.

HOW TO ORDER THE SURFACE FINISHINGS

For the single lever mixers, for the two handles mixers and for the bathroom accessories the finishing is indicated by the 2 letters in the article number:
for example 47 CR 5221.
81 is the code of the JAFAR handle
CR is the code for the Chrome finishing
5221 is the code of the model

You can indicate a different finishing using a different code instead of CR, so:
CR = Chrome
ZZ = OLD BRONZE
RR = OLD CUPPER
OO = GOLD
CO = CROME/GOLD

For example:
47CR5221 is for the chrome
47ZZ5221 is for the old bronze
47RR5221 is for the old cupper
47OO5221 is for the gold
47CO5221 is for the chrome/gold

CARE OF FINISH: We recommend you to keep the surface of the product clean so that the dirt and the limestone don't attack the finish.
To clean the purchased product, use a soft cloth, mild soap and water not to scratch and not to change the finish. The soap should be rinsed with water throughly so that it does not deposit on the tap.
The use of abrasive products (eg. Products containing ammonia) may damage the surface. For such damage the product is not under warranty. The special finishes are the result of particular processes that add value. Minor variations and imperfections are to be considered a virtue of exclusivity of the piece itself.
All the pictures of the finishing are only indicative, therefore are not binding to their real execution. Moreover, the company reserves itself the right to modify or change styles of some finishings without notice.
The warranty on the external nishings of the items is of one year as from the purchase date.

COMMENT COMMANDER LES FINITIONS

Pour les mitigeurs, pour les melangeurs et les accessoires de bains, la finition est indiquée par les deux lettres de la référence article.
Exemple : 47 CR 5221
47 indique la poignée JAFAR
CR indique la finition Chrome
5221 indique la référence de l'article

Vous pouvez indiquer une finition différente en changeant le CR, et donc :
CR = Chrome
ZZ = Vieux Bronze
RR = Vieux Cuivre
OO = Or
CO = Chrome/Or

Exemple :
47CR5221 pour le chrome
47ZZ5221 pour le vieux bronze
47RR5221 pour le vieux cuivre
47OO5221 pour l'or
47CO5221 pour le chrome/or

SOINS DES FINITIONS: Il est recommandé de garder la surface du produit toujours propre afin que la saleté et le calcaire n'attaquent pas la finition.
Pour nettoyer votre produit, on conseil un chiffon doux, un savon doux et de l'eau afin de ne pas égratigner et détériorer la surface. Le savon doit être bien rincé avec de l'eau afin d'évider qu'il se dépose sur le robinet. L'utilisation de produits abrasifs (par exemple des produits à base d'ammoniaque) peut endommager la surface. Pour ces dommages le produit n'est plus sous garantie.
Les finitions spéciales sont le résultat de certains procédés de fabrication à valeur ajoutée. Variations et imperfections mineures doivent être considérées comme une vertu de l'exclusivité de la pièce elle-même.
Toutes les photos des finitions sont à titre indicatif et ne sont donc pas contraignantes sur la mise en œuvre effective. En outre Fiore Rubinetterie se réserve le droit de modifier ou de changer le style des certaines finitions sans préavis.
Les nitions externes des articles sont garanties 1 an à compter de la date d'achat.
